SUMMARY

I am a **Senior Web Developer** with over 5 years and 6 months of experience in building websites and mobile apps. My expertise includes PHP (using Laravel), Vue.js, and React. I have led development teams, built robust backend systems, and integrated payment systems and other services into applications. I have managed client projects from start to finish, resolved legacy code issues, and launched high-performance websites with significant user bases. I am also proficient in mobile app development using Flutter, and I am well-versed in tools like Git and AWS. I excel in leading teams and delivering secure, efficient solutions that meet client requirements.

WORK EXPERIENCE

March 2022 - till now

Senior Engineer : Web - CodeClouds Pvt Ltd

- Engaging in a CMS-based client project involves efficiently implementing project requirements and tasks to ensure deadlines are met punctually.
- Managing Facebook Events for User Engagement and Revenue Tracking. We are focusing on Facebook events to oversee users who land and make purchases through Facebook ads. Additionally, we are monitoring ad spend and the revenue generated through our application.
- Managing Call Centers: A Blend of In-Person and AI Approaches
I am focused on overseeing call centers that integrate both in-person interactions and AI management. The goal is to transform prospective users into satisfied customers.
- Collaborating with CRMs to manage and ship orders, I also integrated CRM APIs to facilitate communication with our application. Additionally, I ensured real-time updates of order information through webhooks within our Laravel application.
- Implemented CRM products within CMS-based applications to manage and process orders from our landing site, while also handling order management and cancellations effectively.
- Efficiently handling payment information to finalize the order, while seamlessly setting up the recurring product with automated shipping features.

Senior Web Developer - Klizo Solutions Pvt Ltd

Apr 2022 - Feb 2025

- Architected and developed multiple enterprise-level web applications using Vue.js and React for frontend interfaces, integrated with Laravel and Node.js backends, resulting in scalable and maintainable solutions for diverse client requirements.
- Implemented and optimized multiple payment gateway integrations (Stripe, WePay) across different platforms, developing robust subscription modules and secure payment processing systems that handled thousands of transactions monthly.
- Engineered RESTful APIs across various projects, ensuring efficient communication between frontend and backend services while maintaining security best practices and comprehensive documentation.
- Developed and maintained responsive web applications using modern technologies including Laravel, Livewire, Blade components, Vue.js, React.js, and NodeJS, resulting in improved user experience and reduced development time through component reusability.
- Led the development of subscription-based platforms, implementing features such as automated billing, plan management, and user authentication systems, while ensuring seamless integration with payment gateways.
- Optimized application performance through implementation of efficient database queries, API response caching, and state management solutions, resulting in significant improvement in load times and overall system efficiency.
- Created modular and reusable component libraries across multiple projects, establishing consistent design patterns and reducing development time by 40% while ensuring maintainable and scalable codebases.

Laravel Developer - Cotocus Pvt. Ltd

Sept 2019 - Apr 2022

- Initially worked as an SEO Specialist for 6 months before transitioning to the development team as a Laravel Developer in February 2020.
- Successfully completed over two projects from inception to release, showcasing proficiency in end-to-end software development.
- Led a major project single-handedly, utilizing Laravel with a Microservices architecture to handle complex tasks independently.
- Developed three mobile applications using Flutter, demonstrating expertise in cross-platform mobile development.
- Strong experience in both backend and frontend development, with the ability to efficiently deliver high-quality solutions.
- Adaptable to diverse project requirements, with a proven ability to manage full-cycle development processes.

PROJECTS

Client Projects - Nformed, Fanfundit, and Perry Management

Internal Projects - Compilerx and Interview Screener

- **Tech Stack :**

- Frontend: React.js, Vue.js, JavaScript, Livewire, Blade Components
 - Backend: Laravel, Node.js
 - Payment Systems: Stripe, WePay
 - Architecture: RESTful APIs, MVC Pattern, Microservices
 - Cloud Technologies: AWS EC2, S3, and RDS
 - Containerization: Docker
 - Caching: Redis
 - Database: MySQL, MongoDB
 - Other Tools: VS Code, GIT, GitHub, JIRA, Bitbucket, HubSpot (CMS), Flutter (Dart)
-

EDUCATION

2016 - 2019

Diploma in Computer Science

Gov. Polytechnic Khutri, Bokaro, Jharkhand

- Specialization in Computer Science Engineering.
-

SKILLS

Technical Skills: PHP, Laravel, Livewire, MongoDB, MySQL, Vue.js, React.js, Node.js, Redis, Git, GitHub, REST APIs, Microservices, Postman, AWS, Bitbucket, Jira, JavaScript. **Soft Skills:** Gen AI, Team Collaboration, Leadership, Remote Work.
