Experience

- April 2022- Present
Klizo Solutions | NewTown, Kolkata

Senior Web Developer

In my career, I have contributed to Six projects, including Three client projects, with one being successfully deployed. My expertise lies in Laravel, Vue, and Livewire, and I have been involved in integrating a US-based payment gateway for seamless payment processing. As a team leader, I managed a group of four individuals, ensuring efficient project execution. My role extended to client project management, where I incorporated new features while maintaining legacy code. This diverse experience has equipped me with a versatile skill set, allowing me to deliver robust solutions and handle various aspects of software development effectively.

- Feb 2020 - April 2022
Cotocus Pvt. Ltd | Bokaro, Jharkhand

Laravel Developer

As a seasoned developer, I have successfully completed over two projects from inception to release, showcasing my proficiency in various aspects of software development. Notably, I accomplished a major project single-handedly using Laravel with a Microservices architecture, highlighting my ability to handle complex tasks independently. Additionally, I have successfully developed three mobile applications using Flutter, demonstrating my expertise in cross-platform mobile development. My diverse skill set, coupled with extensive experience in end-to-end development, enables me to deliver high-quality solutions efficiently and adapt to various project requirements.
